

# Reference Goats

The photos of the goats pictured below are just a **small** sampling from our herd over the years and the photos fall under five categories:

1. Goats that were born on the farm and carry the CornerStone Farm herd name
2. Genetics of purchased goats, used in our herd
3. Related goats (brothers, sisters, dams, sires, etc.) of pedigrees in the herd
4. Udder shots. All udders are 12-hour milking udders, NOT 16 or more hours for show
5. Some of our kids from over the years

## 1A. Does that were born on the farm and carry the CornerStone Farm herd name

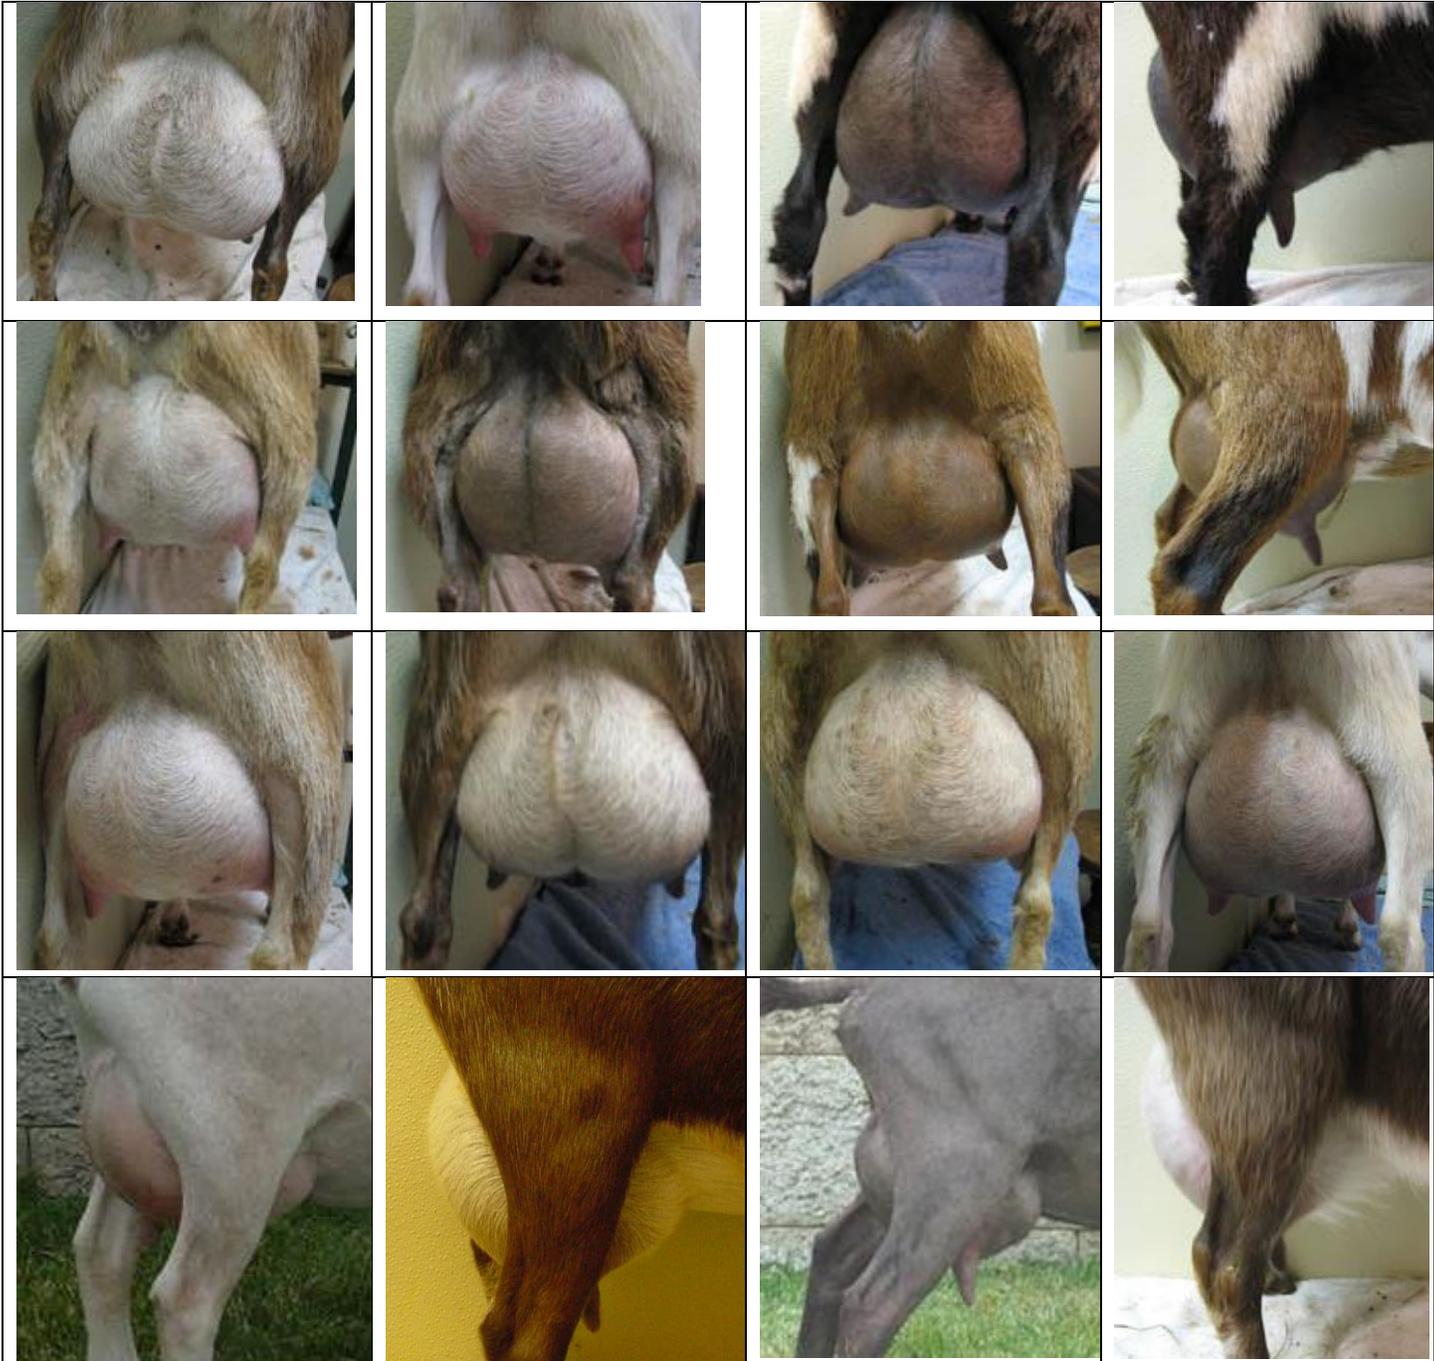

## 1B. Bucks that were born on the farm and carry the CornerStone Farm herd name

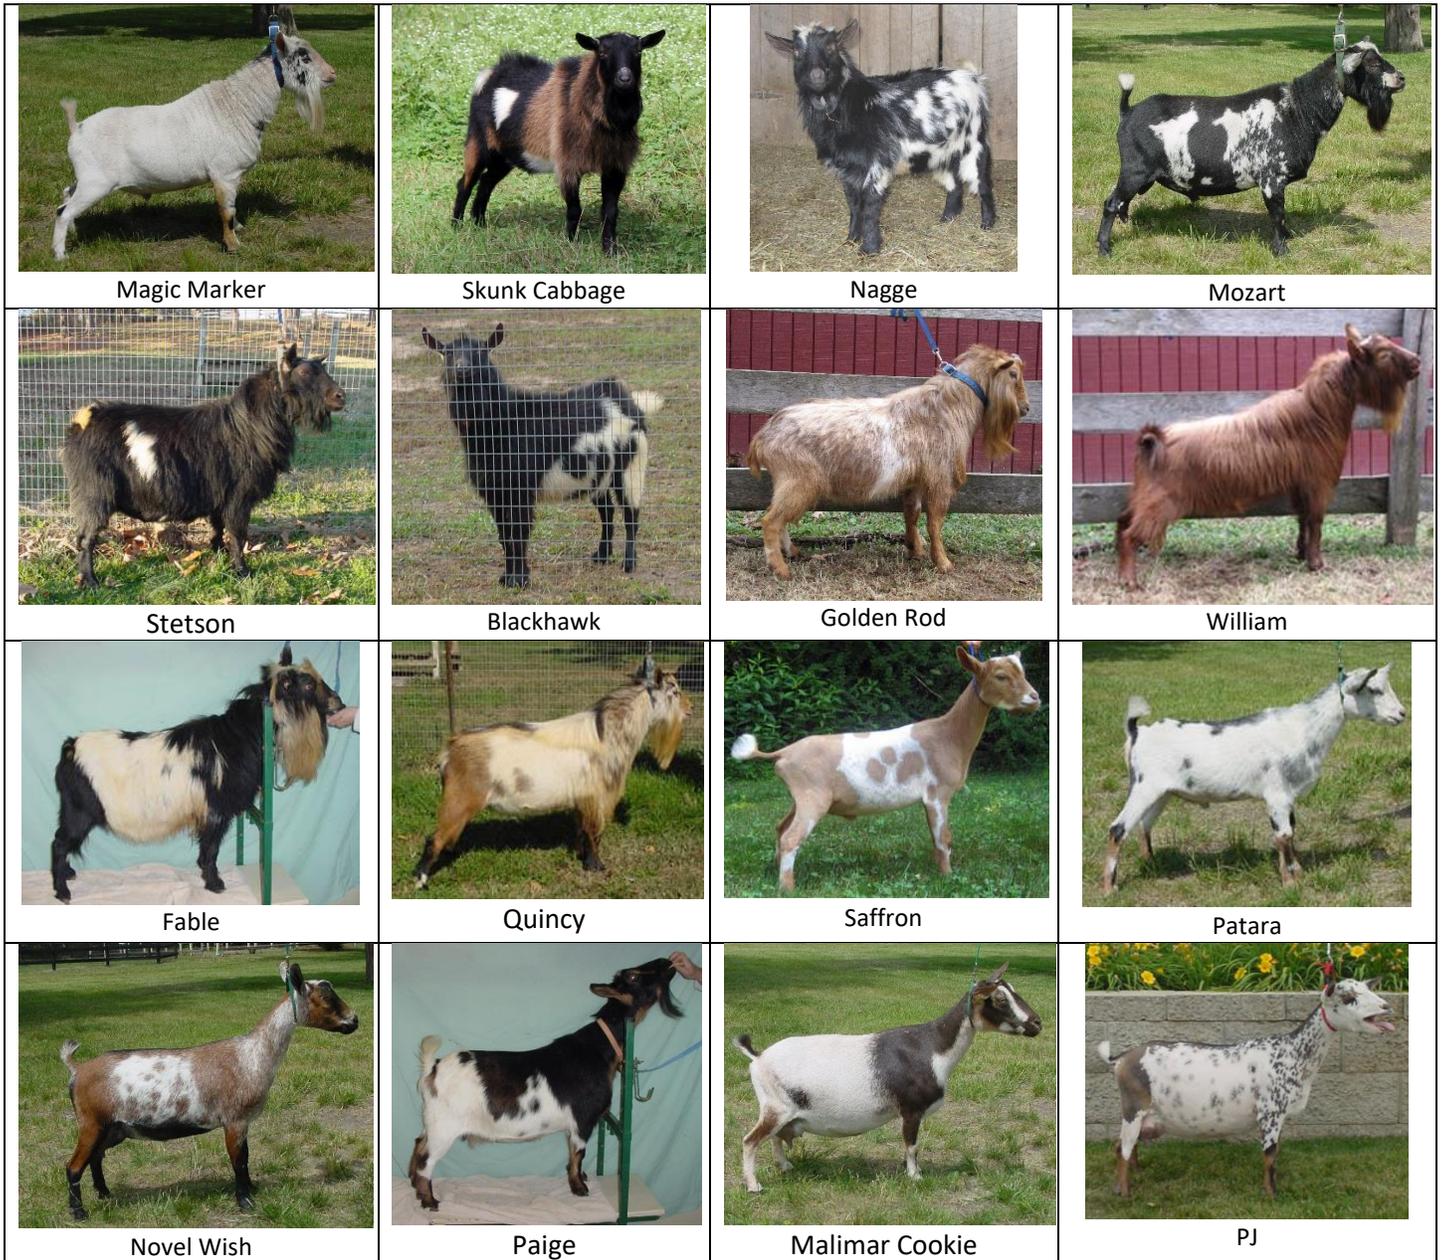

4. Udder shots are 12-hour milking udders, **NOT** 16 plus hours for show. Does in herd.

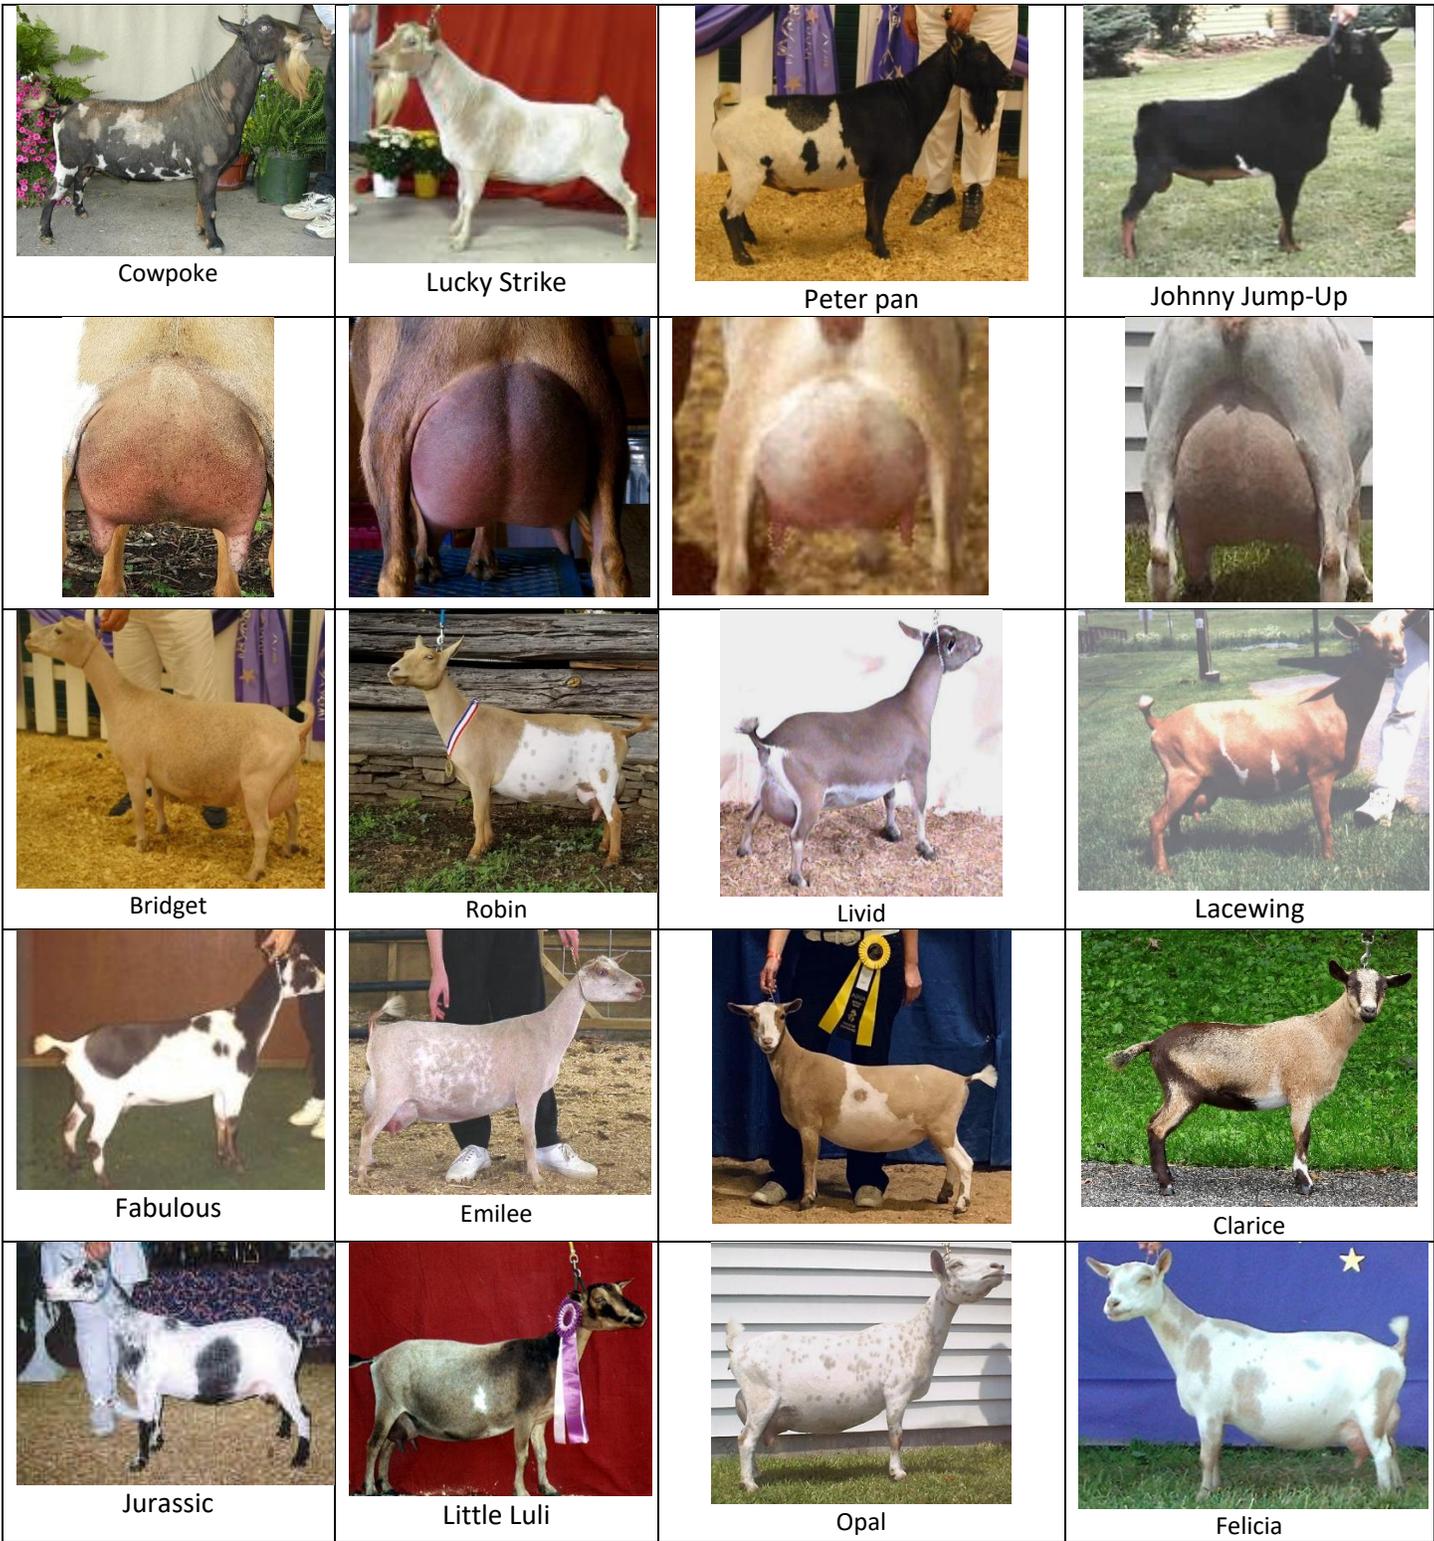

## 2. Genetics that are of purchased goats, used in our herd

## 3. Related goats (brothers, sisters, dams, sires, etc.) of pedigrees in the herd

5. Some of our **kids** from over the years
