<b>Uzzi</b> 82 x Jesiah	10/21	3/15	\$600	\$500	\$125	JP Buckskin <b>All does PENDING</b>	

\*[CornerStone Farm](#) reserves the right to **Retain (R)** a kid from any litter

## Note to Buyers:

This breeding season (2021-2022) had been a hard season to catch heat cycles, due to the unseasonably warm Fall and Winter temperatures, causing re-heats or just not cycling heavy.

By late December, I chose to place Jesiah in with the does that I felt did not cycle or came back into heat, as a “clean-up” buck. I chose Jesiah because of the proven lines in his pedigree and the fact he was not related to the number of does that needed to be placed with a single buck.

I had already placed him on does prior to using him as the clean-up buck, and they already settled by him. Any questions, please don't hesitate to ask: [thefarm@cornerstonefarm.net](mailto:thefarm@cornerstonefarm.net) or call **434-735-0527** (LAN Line).

**Kidding season** has not produced what everyone hoped for. It looks like a buck year. The does on the ground will be offered to buyers with standing reservations. Check back later to see if any are available.

### **Thank you for your understanding and patience.**

- ❖ Discounts given to performance herds that regularly participate in Shows, LA, and DHIA programs.
- ❖ Breeding pairs may change and wait list will be notified, if this occurs.
- ❖ \$50.00 non-refundable deposit is required to reserve kids. A refund will be extended if selected pairing does not produce desired requests and another pairing is not chosen by the buyer.
- ❖ Balance of purchase price is due prior to the goat leaving the farm or cash in hand when picking up, at the farm.
- ❖ Transportation fees, associated veterinary costs, or any other expenses for transport are the responsibility of the buyer.
- ❖ Limited Health Guaranteed once the purchased goat leaves the property. Ask for details.

**NOTE:** Buyers often ask why the difference in costs? There are many reasons that attribute to our pricing structure. These are the main reasons:

- ✠ A new goat (doe or buck) was retained or added to our herd. We select new stock very carefully to further enhance our breeding program. Since the goats are new, we may price them lower, due to the fact we don't know what the new animal will produce with each pairing. If new purchase pedigrees are proven by the breeder, we may retain higher prices, depending on the pairs.
- ✠ We price first fresheners lower/mid-range. Depending on the pairing selected, kids are priced according to past performance from those lines.
- ✠ Some are priced based on past performance where lines that have not been paired in the past are being used.
